

Arrival Dates and 90 day Entry Vignette (visa) for travel to the UK

When you make your Student visa application, you will be asked to put an arrival date in your Student visa form and this date will be used to generate the permissible entry dates on your visa vignette (sticker in your passport). This Vignette then allows you to come to the UK within a set 90 day period and you collect your visa card once you get to the UK. You cannot come to the UK more than one month before the start of your course and so your vignette will not start before then irrespective of whether you put an earlier date.

If you do not yet know your exact date of travel, it is possible to work out a suitable 90 day arrival window depending on what date you put in the form. We have made a table below to help you.

For example, if you hope to arrive in September, but would like the additional security of knowing you have extra time to arrive should you need it, you could put a proposed arrival date of 20.09.21 in your Student form. This would generate an arrival vignette from 13.09.21-.10.12.21
